

JumpStart Standards Alignment

The National Standards in K–12 Personal Finance Education (2015) describe the concepts and abilities the JumpStart Coalition for Personal Financial Literacy has identified as providing students with the necessary tools for creating financial well-being. The standards are designed to provide a framework to both promote instructional consistency nationally and facilitate customization locally. The fourth edition of the standards identifies six major categories of personal finance: Spending and Saving, Credit and Debt, Employment and Income, Investing, Risk Management and Insurance, and Financial Decision Making. Each category is described in terms of an Overall Competency, which is further broken down into grade-level-specific knowledge statements and standards. The knowledge statements define what students should know and benchmarks suggest specific skills that demonstrate students' ability to apply what they know in everyday contexts. The finEDge Standards Alignment focuses on the standards rather than the benchmarks, as the standards provide guidance regarding content, whereas the benchmarks suggest specific tasks to assess student progress towards mastery of the standards. Our curriculum addresses the standards through alternative sets of tasks.

Category	Standard Number	Standard Language	Module Number	Lesson Number	Lesson Title
